THE REPORT

OF THE

PRESIDENT OF THE QUEEN'S COLLEGE, CORK,

FOR

THE SESSION 1901-1902.

TO THE KING'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY :

I have the honour to submit, with my very humble duty, a Report on the condition of Queen's College, Cork, for the Session 1901-1902.

The number of students attending the College during this period was 185 matriculated and 5 non-matriculated. The number of new students was 61. Of these 49 came from the Royal University of Ireland; 17 from other Colleges and Universities, and 5 were non-matriculated. This shows an increase in the number of students of the College over last year, when they numbered 171.

This College was founded in the year 1849. During the Session of 1853-54 the number of students was 140. From that time till the formation of the Royal University of Ireland, and the extinction of the Queen's University, the College was steadily increasing in numbers and reached in 1881-82 the number of 402 students; this was the time when the Queen's University came to an end. From the time of the foundation of the Royal twenty years ago, the number of the students in this College has steadily decreased, till last year it fell to the number of 171, the lowest number of students since 1860.

I am happy to be able to state what I have done as regards the College attendance during the last Session.

I trust that it indicates a turning point in the history of these numbers. I cannot think, however, that the Arts Faculty especially will return to its former prosperous condition as long as the present system of giving degrees to students who do not follow University Lectures is allowed to continue in Ireland without at least some serious modification.

I regret to have to mention that the College has lost the services of Professor Brereton Barry, who for many years took with great ability and success the Chair of English Law. Mr. Barry has become a County Court Judge, and he carries with him in his

new career the good wishes of myself, and I am sure I may add of all those who have been associated with him in the teaching of Queen's College, Cork.

During the course of the Spring the Royal Commission on University Education in Ireland held sittings in the College. The evidence given by me and by several of the Professors went so fully into the requirements of the College for doing work up to the highest standard of University Education, that it is hardly necessary for me to allude to it in this Report. The evidence given by several members of the Medical Faculty concerning the facilities which Cork affords for clinical teaching, well deserves the careful consideration of all those interested in the spread of scientific Medical Education in Ireland.

I should like in conclusion to repeat again what I have so often said on previous occasions regarding the great and absolute necessity for increasing the number of chairs in the College. In the Natural History Department the duties imposed upon the Professor are much too manifold, and the same remark obtains as regards the Professor of History and of English Literature. If certain reforms often suggested by me were carried out, and at the same time changes made in the general system by which degrees are now obtained in the Royal University I have no doubt whatever that the Queen's College in Cork is capable of rendering much greater services to the Province of Munster in the future than it has done even in the most successful and brilliant period of its past history.

I have the honour to remain, with humble duty,

Your Majesty's most faithful servant,

ROWLAND BLENNERHASSETT (Bart.), *President.*

Queen's College, Cork.

July 14, 1902.
